Bald Eagle
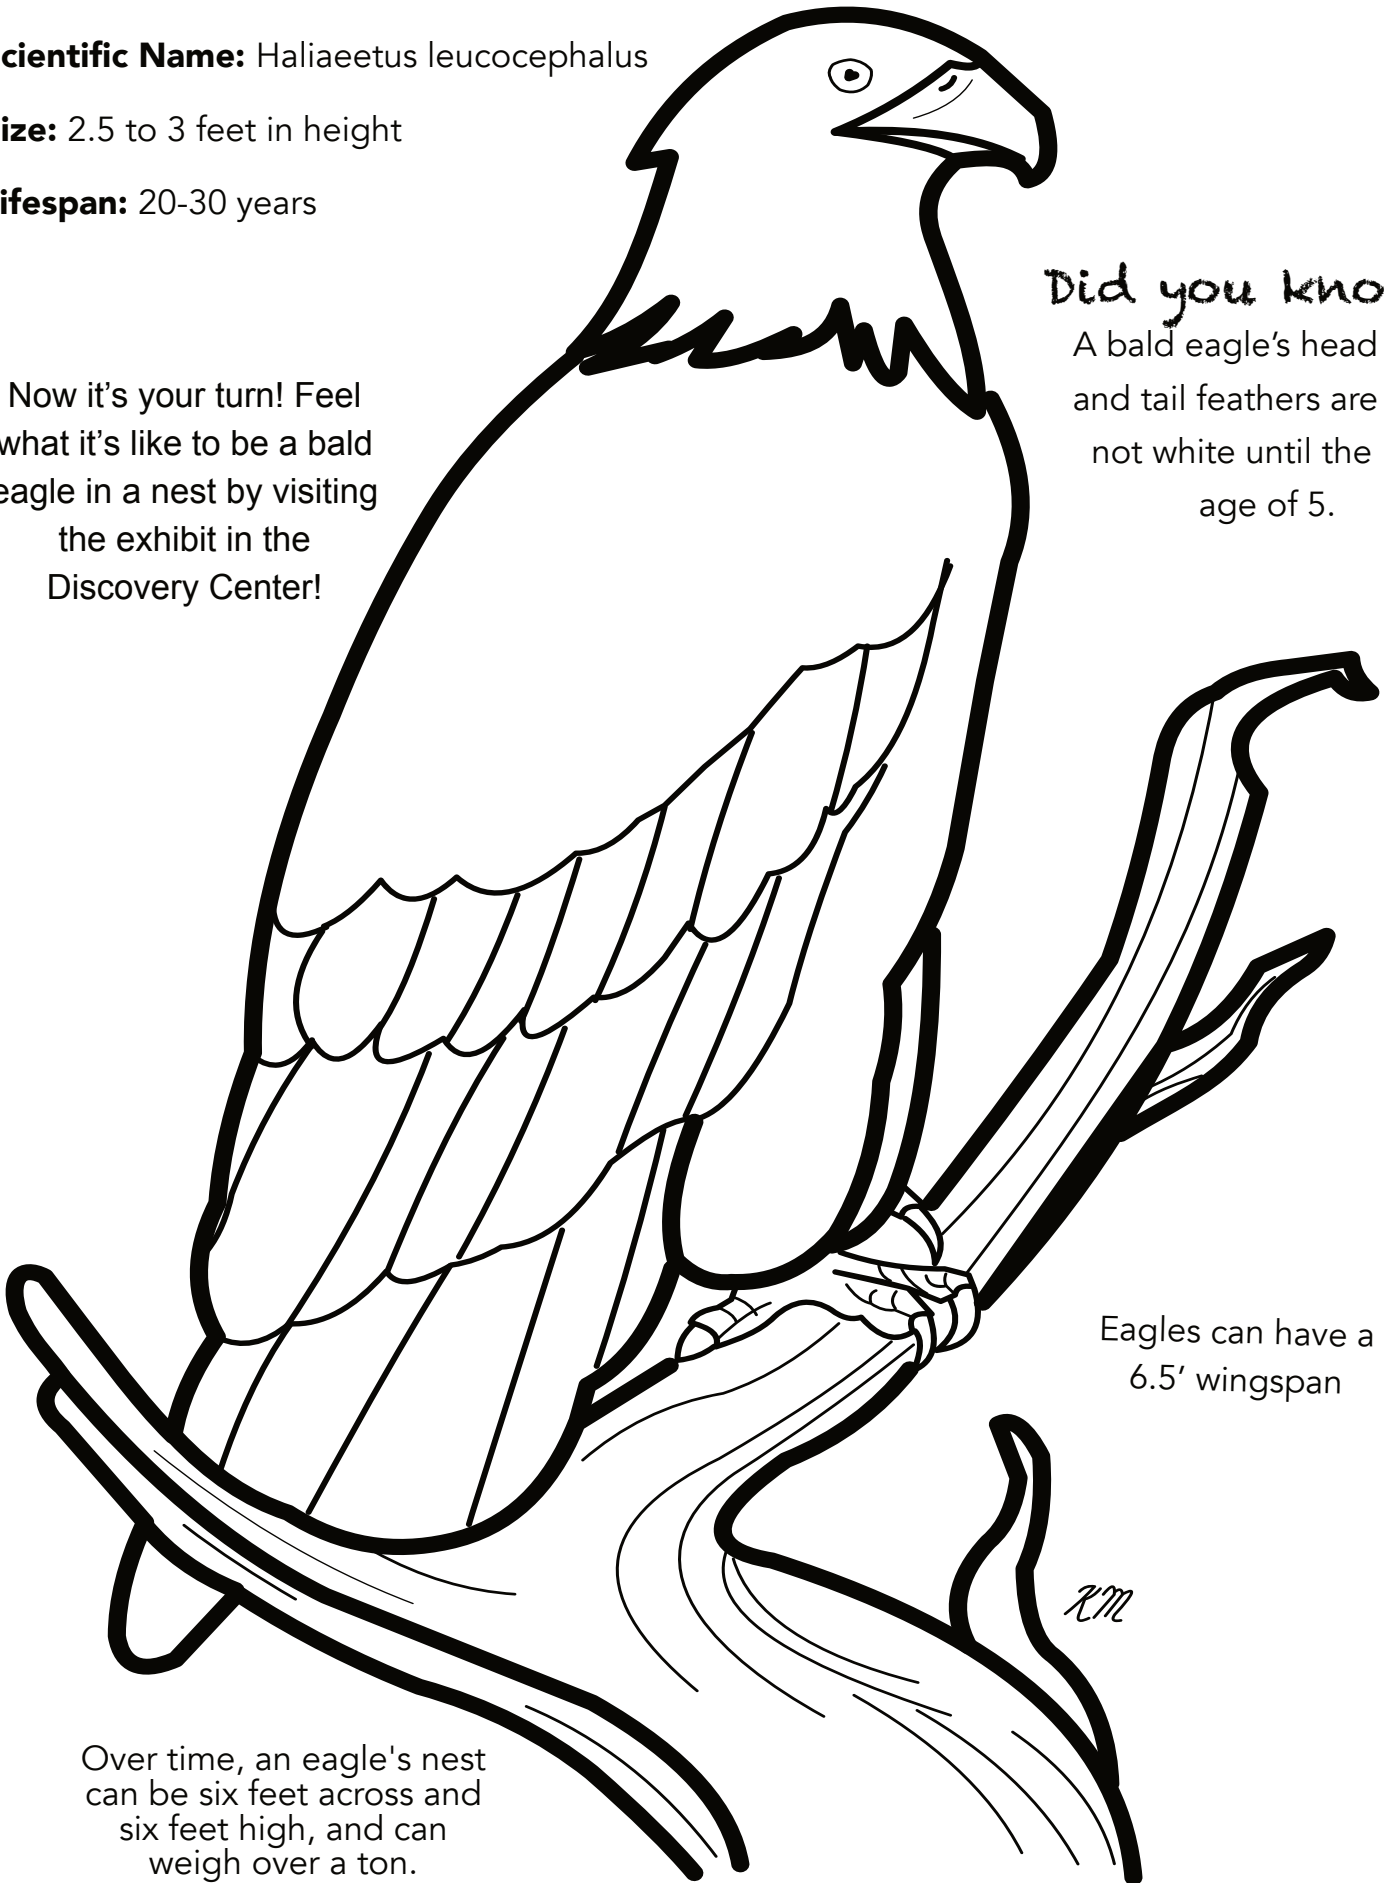

Scientific Name: Haliaeetus leucocephalus

Size: 2.5 to 3 feet in height

Lifespan: 20-30 years

Now it's your turn! Feel what it's like to be a bald eagle in a nest by visiting the exhibit in the Discovery Center!

Did you know: A bald eagle's head and tail feathers are not white until the age of 5.

Eagles can have a 6.5' wingspan

Over time, an eagle's nest can be six feet across and six feet high, and can weigh over a ton.
